EDITION

THE EDITORIAL TEAM

Dear Esteemed Readers, Welcome to the latest edition of "The Sun"

It is with great pleasure and anticipation that I present to you this stunning showcase of the achievements, experiences and stories that have unfolded within our school community throughout the year. This year's publication is a dazzling array of remarkable creativity, boundless passion and exceptional talent that define our school community.

I am profoundly amazed by the talent and passion displayed in the articles, artworks, poetry and images featured in this magazine. I am also immensely proud of how our learners and staff have pushed boundaries and explored new ideas, sharing their thoughts and experiences with remarkable enthusiasm. Each piece herein has been curated with meticulous care, attention to detail, precision and purpose to provide a rich tapestry of perspective, ideas and experiences that reflect the kaleidoscope of talent within our school walls.

I would like to extend my deepest gratitude to all the contributors, editors and designers whose boundless love for the school, unwavering commitment to excellence and relentless pursuit of artistic perfection have truly brought this publication to a reality. Your efforts have finally paid off and your talent shines brightly within these pages.
I am incredibly confident that you will find the content both captivating and enriching. As you immerse yourself in the wonders of this publication, prepare to be enlightened, entertained and inspired.

I thus implore you to explore every page of this edition with an open mind and a curious spirit, ready to be transported to new realms of knowledge and imaginations. Let the words and images within "The Sun" ignite your passion, stimulate your intellect and fill you with pride for our school community.

Thank you for joining us on this literary journey and I hope you enjoy reading this remarkable publication as much as we enjoyed creating it.
Kind regards

NTALE FRANCIS
CHIEF EDITOR.

MESSAGE FROM THE DIRECTOR

Dear Sun readers,
It is with immense pride and gratitude that I pen this message for the second edition of our school's e-magazine. I extend my heartfelt thanks to all our readers, contributors, and well-wishers who supported the first edition. Your feedback and suggestions have been invaluable, especially in highlighting areas for improvement in our Co-curricular activities this year 2024.

This year's edition focuses on the theme "Integrated skills development, My Identification" and capping it all off by the two music and drama events of both the Pre-Primary and Primary sections that ended term 3 as shall be seen herein.

This year's edition focuses on the theme "Integrated skills development, My Identification"

As we approach a momentous milestone of glorious 35 years nurturing young minds and shaping futures, I invite you to join us in celebrating this incredible journey. Next year, we mark this anniversary with great enthusiasm and reflection, acknowledging the impact our school has made on countless lives.

To commemorate this milestone, we are thrilled to announce the groundbreaking of two significant new structures, which will enhance our facilities and ensure that future generations of students thrive in an environment that fosters growth, creativity, and excellence. These additions are a testament to our commitment to progress and innovation.

I extend a special invitation to all our alumni to be part of this celebration. Your journey began within these walls, and your achievements are a source of inspiration to our current learners. Let us come together to honor our shared legacy and shape the vision for the future.

Thank you for being an integral part of our community. May this edition of our e-magazine inspire and inform, as we continue to grow together as a family.

Warm regards,

Lukwago Grace Harriet
Managing Director

"We educate to build the Nation"

MESSAGE FROM THE CHAIRMAN SCHOOL MANAGEMENT COMMITTEE

Sincere gratitude is extended to the School Directors for their resourcefulness and unwavering focus on providing essential guidance alongside the established effective policy framework which have greatly contributed to the smooth operation of the school, ensuring that we provide excellent value for money to all our parents and guardians.

On behalf of the School Management Committee (SMC), I would like to extend my deepest appreciation to the Principal, Head teacher, and all our dedicated staff, both teaching and non-teaching. Your unwavering commitment, selfless service, and teamwork have been instrumental in our continuous success year after year.

I would also like to take this opportunity to thank our parents and guardians for entrusting us with the education of their children. We remain committed to providing not only a rich academic environment, but also a nurturing space that fosters holistic development, preparing our students for success in both their personal and professional lives, and contributing to the growth of our society and country.

St. Francis Day and Boarding Nursery and Primary School, located in Kigoowa, Ntinda, Nakawa Division, Kampala, is proud to be one of the leading private schools in Uganda and East Africa. Founded 35 years ago by visionary educators, our school has always welcomed children from all backgrounds, regardless of color, race, faith, or political affiliation. We have remained committed to supporting the national efforts to provide quality education to all children.

As we move forward, I encourage all stakeholders to share the success and positive impact of our school with others. Please invite those who may not yet be aware of our excellent educational offerings to consider enrolling their children at St. Francis Day and Boarding Nursery and Primary School, Kigoowa Ntinda.

I wish you all a Merry Christmas and a Prosperous New Year.

Magona Simon Mike Mahebe
Chairman, School Management Committee

MESSAGE FROM THE PRINCIPAL

Dear Readers,
As we unveil this year's edition of our magazine "The Sun", I am thrilled to reflect on a year of remarkable achievements at St. Francis Day and Boarding Primary School Ntinda – Kigoowa.

Guided by our inspiring motto, ***"Educate to build the nation"***, we have lived our vision of producing all-round learners and our mission of equipping them with knowledge and skills for self-reliance.

> ***We crowned the year with two grand events: the Top-Class Valedictory at Theatre Labonita and the vibrant competitive showcase of Music, Dance, Drama, and Poetry.***

This year has been filled with activities that showcased the exceptional talents and resilience of our learners.

In sports, our teams excelled in soccer and swimming, while the Arts and Technology Department shone with creativity and innovation. Strong academic performance complemented these successes. We crowned the year with two grand events: the ***Top-Class Valedictory*** at Theatre Labonita and the vibrant competitive showcase of ***Music, Dance, Drama, and Poetry.*** These events epitomized the spirit of joy, unity, and excellence that defines our school.

Our core values; fear for the Lord, care and respect for one another, celebration of achievements, and appreciation of cultural diversity; continue to guide our nurturing environment where every learner is valued and empowered.

My heartfelt gratitude goes to our Directors, dedicated staff, supportive parents/guardians, and hardworking pupils for making St. Francis a beacon of hope and excellence. Let us continue to inspire greatness. Merry Christmas and a Prosperous 2025!

Paul Richard Kasadha
Principal

LEGACY OF A LEADER

On behalf of St. Francis Primary School, its leadership, staff, parents and pupils, I extend my warmest and most heartfelt congratulations to the entire community for completing all assignments and tasks for the years covered for the extraordinary progress and support given to the school.

"A leader by example demonstrates the values of hard work, integrity and resilience." In leadership we need to shake off the mindset of inferiority and mediocrity, self-doubt, fear and low esteem. I thank God and appreciate Him for the blessing of seeing the fulfillment of my dreams as Senior Administrator for the school.

A visionary leader can inspire and drive the growth and development for excellence. As we celebrate the edition of this magazine to a remarkable achievement of milestone covered, I strategically wish to seek God to continue giving healthy vision and insight to cause more transformation of our society to strive for sustainable progress endlessly.

The school leadership structure is built on different levels of administration that's to say; Board of Directors, School Management Committee, school leadership team heads of department, class teachers, support staff, prefects and pupils. All these independent decisions, make room for planning efficiently and timely.

Our staff is devoted and developed through Continuous Professional Developments (CPDS) for improved knowledge and skill acquisition. Engagement in school Sacco for personal benefits and growth by acquiring loans for sustaining themselves and solving immediate problems.
Insurance Health Service Scheme is under study to provide health care treatment.

Also, a five-year strategic plan for erecting housing estates for our staff to have a feeling of a teacher's village in future.

By the grace of God, I have much to show for the years of service. Regards to all, to read this magazine and relax.
God bless you all.

Asingwiire Ivan
Senior Administrator

MESSAGE FROM THE HEAD TEACHER

Hullo readers,
I am humbled to share that the Academic Year 2024 has been driven by the theme: "Integrated Skills Development, My Identification" which was well thought of by our expert team of staff members with focus on necessity for our learners to survive and thrive in the world we live in today.

With the proper appropriation of school resources by the Directors and support from the school partners in development, most especially the parents/guardians, accomplishment of all the planned activities has been recorded.

Our learners have exhibited enhanced acquisition levels in; critical thinking, collaboration, creativity, communication and many more skills. This is evidenced in the behavioral change, the excellent academic achievements and the witnessed Music, Dance, Drama and Poetry (MDDP) theatre production that wound the year in a hot competition among the four Houses into which our learners are grouped.

The highly profiled closure of 2024 has set the pace, year 2025 shall take its course as we advance, identify and develop learners' talents in a holistic approach to produce a 21st Century individual.

Merry Christmas and happy new year.

MWIMA THOMAS
Headteacher

Our learners have exhibited enhanced acquisition levels in; critical thinking, collaboration, creativity, communication and many more skills.

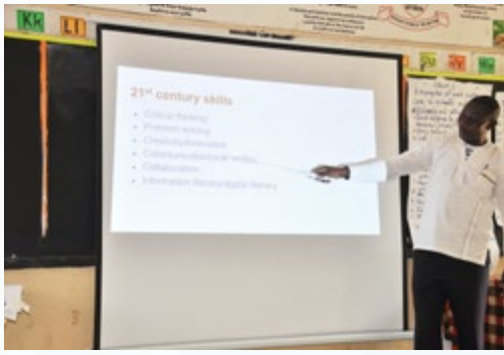
WORKSHOP



MESSAGE FROM THE IT DESK

Tumusiime Micheal David
IT – Admin

In a school setting, when IT is mentioned, most people only attach and relate it to teaching computer studies, which is mostly basic instruction of computer applications. But we cannot limit ourselves to instruction in the current era because IT is such a vast player in our daily lives today. We are all witnesses that our lives are partly controlled by technology for example hospitals, marketplaces, banks, schools, and recreation centers etc.

In fact, with the emergence of AI, it's now evident that several tasks can be handled by IT.

In our school, we now have the Enterprise Resource Planning system that has quickened our internal processes. All processes from application for a vacancy to admission and then to the daily activities of learners and staff are now done through this system.

Parents now have access to the ERP where they can log in to access details of their children like performance, attendance, fees payment, and school program, etc. This has only been possible because of IT.

We are glad that as a school, we are integrating technology for example; we have had Computer-aided learning and online meetings and now more than 50% of our processes are managed and controlled digitally. We hope to even make it better in 2025.

In conclusion, IT being a great player can also be disastrous so we all need to be extra careful.

MOTIVATION

Ntale Francis
Head of Languages

"A person who feels appreciated will do more than expected because appreciation is one of life's greatest motivators."

Motivation is the feeling of wanting to do something, especially something that involves hard work and effort. It also means to be moved by something so strongly that it becomes an inspiration for you. Motivation and language are inseparable. The composition of the words we tell our children make or fail them in life. Employees feel safe when they listen to hopefulness from employers and vice versa.

It is prudent for us to understand that a few people are self-motivated. Most of the motivation comes from those around us. ***Ephesians 4:29 says, "Do not let any unwholesome talk come out of your mouths, but only what is helpful for building others up according to their needs, that it may benefit those who listen."*** Therefore, as custodians of language, it is paramount that we package our words in a way that encourages the young, the youth and the old, giving them hope that success is just a matter of time regardless of the current obstacles.

COMMITMENT TO NURTURE AN EXCELLENT AND HOLISTIC LEARNER.

Richard Mutiibwa
Head of Upper Primary

Upper section years are more than a transition but a journey of self-discovery, growth and endless potentials in academic and beyond. The dedicated team of teachers in the section shares a commitment of nurturing an excellent and holistic learner through the well planned academic, co-curricular and social activities in the school. Together, we will continue guiding and modelling the young generation to foster independence, creativity, responsibility and confidence during their critical and dynamic stages of their educational journey. Dear learners, parents/guardians, remember our MDDP theme for the year 2024, "Technology, a green snake in green grass". If not well utilized get ready for its dangers. Have a prosperous New Year 2025.

THE COOKERY CLUB

Komugisha Allen
Club Patron

As pupils of St. Francis, we are constantly reminded that success is not just about academic, but also exploring our passions and talents.

And in this case, the passion is cooking and baking which serves up a recipe for success that goes far beyond the kitchen.

Our cookery club is more than just a group of pupils who love to cook and bake. We are a community of young chefs who are learning to work together, support each other and push ourselves to greater heights.

Through cooking and baking, we are developing essential life skills like

teamwork, creativity and problem-solving.

As we look to the future, we are excited to continue growing and learning together and also welcome everyone whether a seasoned chef or just a starter to come and taste the flavor of success with us in baking, cooking and food services.

Join the cookery club and discover the recipe for achieving your dreams.

UGANDA! THE EPITOME OF CREATION.

Maganda Charles Nsadha
Teacher of SST & R.E.

Whereas different writers refer to the wonderful character of the Amazon with heavy rains, high temperatures, the dense forests enhanced by the vast species of animal life, I bring Uganda to you; Located along the Equator and in the centre of the East African Region. With humid, warm and cool weather conditions determined by the altitude you may pitch your tourist tent.

The Equatorial, tropical and cool montane climatic zones enhance the fertile soils that have made Uganda the food reservoir to the East Africa Community. The Great Rift Valley, plateaus, mountain ranges, engulfed by the country's fresh waters from L. Victoria the source of the longest river on the planet define what Sir Winston Churchill called "The Pearl of Africa".

With the effort of government, our culture, drainage and relief features, forests and grasslands that harbor Mountain gorillas of The Kigezi Highlands, Ostriches and White Rhinos of Kidepo Valley, over 400 bird species of Kibale Forest, Zebras and Kobs of Lake Mburo, Crocs and Hippos of Murchison Falls and climbing lions of Queen Elizabeth surrounded by hot springs, salty lakes in the Western Region have made Uganda a tourist trap hence one of the fastest growing economies in Africa. Indeed, Uganda is ***"The Epitome of creation"***.

THE MATH DESK.

Gamusi Dennis
Head of Mathematics Department

Mathematics is a language expressed in different ways but summarized in four operations namely; addition, subtraction, multiplication and division.
Mathematics literacy requires effective

teaching strategies that foster confidence, fluency, accuracy and problem-solving skills in young mathematicians.

Here, at St. Francis Primary school, strategies like Concrete Representational Abstract (CRA) approach, differentiated instructions, real life relation, collaborative learning and timely feedback filled with encouragement have fostered mindset growth and confidence in our learners towards the mathematical language.

In addition to the above, mathematics teachers ought to use innovative approaches, provide a supportive learning environment and continuous concept practice. These help to inspire confidence, creativity and mathematical fluency in students.

CREATE AN ENVIRONMENT THAT ENABLES LEARNERS TO THINK FOR THEMSELVES, QUESTION ASSUMPTIONS AND DEVELOP INNOVATIVE SOLUTIONS.

Ronald Wambuzi
Deputy Headteacher Academic.

We thank the almighty God for the year's accomplishments, achievements and challenges that have been registered this academic year, 2024. The shortfalls, are our basis of planning for the new academic year 2025. To all achievements and accomplishments; we are proud and give glory to God. I am so grateful to the academic board for the commitment and zeal to accomplish tasks.

Our major focus for 2024 has been centered on delving deeper into critical thinking development, differentiated teaching and learning which responds to diverse learning needs, interests and abilities of children. Our task as a school is solely creating an environment that enables learners to think for themselves, question assumptions and develop innovative solutions.

Traditional education systems often prioritize rote memorization and standardization of knowledge which does not solve the rapidly changing global landscape demands. It is through this observation that at St. Francis P/School, we have tailored all our academic programs and activities to child – centered approaches to holistic education which prioritizes children's unique needs, interests and experiences and therefore; incorporated differentiated learning and teaching to cater for diverse learners' needs.

By prioritizing children's agency, autonomy and individuality, we are striving to prepare our learners for an uncertain future with the right skills of creativity, critical thinking and collaboration that will guide and support them in problem solving.

Even with our great focus this year, all these strides taken will remain our major

areas of focus and concretization in the new academic year, 2025.
Merry Christmas and a Happy new year, 2025.

"Educate To Build the Nation".

MESSAGE FROM THE HEAD LOWER SCHOOL

Ms. Nantondo Florence
Section Head of Lower Primary.

Welcome to the Lower section, St. Francis Day and Boarding Primary School Ntinda – Kigoowa.

The section has a vibrant team that focuses on helping the children achieve their potential through improved literacy levels.

Our decisions are made with the children's best interests. We focus on developing the life skills of our learners thus preparing them for the next stage of life.

We uphold values like, respect, love, care, honesty, teamwork and more. We encourage a growth mindset to help our learners outgrow the fear to make mistakes.

In the lower primary section, learning is fun and exciting. We continually evaluate our practices to provide better education to our children.

Our purpose is to have every learner leave with an experience that is intriguing, inspiring and wholesome. We depend a lot on your support, come let us work together as we "Educate to build the nation".

Merry Christmas, Happy New Year 2025.

"WITH GOD ALL THINGS ARE POSSIBLE" (MATTHEW 19:26)

Katusabe Passy
Deputy Headteacher Pre-Primary.

St. Francis Pre-Primary and Day Care Centre has been my home all the way from 2006 till now. I sincerely thank the Directors and the entire management of St. Francis for being good to me, especially the mother of the school Mrs. Lukwago Grace. She has been my trainer, mentor and coach. She has inspired and motivated me to remain a Deputy Headteacher of Pre-Primary for all these years. Thank you, management, for the care and love given to me.

Secondly, I thank the parents/guardians for choosing St. Francis Pre-Primary and Day Care Centre Ntinda. As a school, we shall continue promoting a holistic approach by making sure that our lovely babies are developed physically, spiritually, socially, and intellectually. I encourage everyone to bring your babies to St. Francis Pre-Primary and Day care Centre Ntinda, a home away from home.

May the Almighty God bless you all, Merry Christmas and a prosperous new year 2025.

FOCUS ON THE HOLISTIC EDUCATION

Joshua Makaye
Deputy Headteacher Co-Curricular.

Dear readers, we are deeply grateful for the blessings that the Lord has bestowed upon our efforts to provide a holistic education aimed at transforming our communities.

We extend our heartfelt gratitude to all those who have contributed to the holistic education of our children. As educators, it is important for us to acknowledge that the world is changing at an accelerated rate, and we need to adjust our approaches to keep abreast with the evolving modes of life. It is crucial for us to pause and reflect on the entire education system. At St. Francis P/S Ntinda, we are dedicated to ensuring that we equip our learners with the necessary skills to navigate the challenges they will find in life through a well-balanced curriculum and a wide range of extra-curricular activities i.e. liturgy activities, clubs, games, sports, music, dance, drama, art and technology.

In the bid to focus on both academic excellence and holistic development, what we instill in them are values, skills and principles that foster critical thinking, communication and collaboration, resilience and independence, shaping them into responsible citizens and making them relevant in the international realm.

I am confident that the children who have gone through the entire primary school at St. Francis P/S Ntinda are proud of their Alma Mater and cherish every moment they have had in school. We strongly believe that the community is enriched by their achievements.

ENVIROMENTAL FACTORS AFFECT WILDLIFE

Monica Susan Mbaine.
Patron Wild Life and Environment.

Environmental factors include climate change, habitat loss and biodiversity which all make the ecosystem un-healthy, putting Wildlife at greater risk.

Climate change
Climate change has produced a number of threats to the wildlife and environment. Rising temperatures lower many species survival rates due to changes that lead to less successful reproduction.

Habitat loss
All the animals interact with their environment for energy gain and loss to protect themselves and for each other's activity. In recent years, world human population increased so fast that depleted the natural resources, degraded the environment and destroyed the habitat of animals.

NURTURING YOUNG SCIENTISTS AT ST. FRANCIS PRIMARY SCHOOL -NTINDA-KIGOOWA

Ngabirano Ernest
Teacher of Science

At St. Francis Primary School, Integrated Science goes beyond the classroom to ignite curiosity, creativity, and problem-solving in young learners. Through learner-centered and hands-on teaching methods, pupils develop essential skills such as observation, analytical thinking, and critical reasoning. Real-life applications of science, including environmental conservation and health education, equip them to address everyday challenges.

The integration of Information Technology (IT) has transformed science education, with tools like virtual simulations and interactive apps enhancing the understanding of complex concepts. Pupils engage in practical activities such as experiments, project work, and community initiatives, fostering teamwork, creativity, and innovation. Examples include engaging in project work, crop growing practices, and participating in tree planting and waste management projects especially following the 5Rs as used in waste management.

Our dedication to quality teaching has led to consistent academic success, with alumni excelling in fields like medicine, engineering, and environmental science. We encourage parents to nurture curiosity at home through simple science activities, living a good health life style by implementing good health practices at home and inspire learners to explore the world around them. At St. Francis, we are committed to preparing the next generation of scientists and innovators.

At St Francis your child is guaranteed excellent service and strong foundation of ; academic ,social, spiritual and human aspects of life.

THE PURPOSE OF TEACHING LITERACY

Namayanja Rebecca
Ass. Head of Science Department

The goal of teaching literacy is to help learners develop the ability to read, write, speak, and listen in a way that allows them to communicate effectively and understand the world around them.

Effective literacy teaching involves:

- ***Understanding the learning process:*** Being aware of the complexities of learning literacy.
- ***Getting to know the learners:*** Understanding the needs of the learners.
- ***Using a variety of strategies:*** Using a range of methods to teach literacy.
- ***Creating a supportive environment:*** Fostering an environment that is engaging and supportive to promote learners' success.

In many schools today, literacy can be embedded in every subject by prioritizing disciplinary literacy. This ensures that all learners are included and no one is left behind.

Learners that can't read effectively fail to grasp important concepts, score poorly on tests and generally, fail to meet the educational milestones.
At St. Francis we embrace, handle and equip our learners with the necessary skills in literacy to enable them face the challenging world.

THE POWER OF A HEALTHY LIFESTYLE

Walter Okello
Teacher of Science

As we travel through life, it becomes clear that adopting a healthy lifestyle is essential for a happy and fulfilling existence. This truth applies to everyone, regardless of age, background, or where we live. Whether in bustling cities or peaceful countryside, taking care of our bodies, minds, and spirits is crucial.

A healthy lifestyle revolves around three main factors: eating nourishing foods, staying active, and caring for our mental health. Eating a balanced diet rich in fruits, vegetables, whole grains, and healthy fats provides us with the energy we need to learn and play. These foods fuel our bodies and help us grow strong.

On the other hand, relying too much on junk food can leave us feeling tired and unwell, affecting our quality of life. It's important to make smart choices about what we eat. Regular exercise through sports, dancing, or just having fun with friends; not only keep us fit but also bring joy and satisfaction.

Mental well-being is also important. Taking time to relax, building strong relationships with those we care about, and reaching out for help when we face challenges can strengthen our resilience. A calm mind helps us learn better and supports our success in school and beyond.

Choosing a healthy lifestyle is an important investment in our overall wellbeing. By nurturing our bodies, minds, and spirits, we open the door to a vibrant, happy life filled with purpose. Let's embrace this journey together and shine with the energy of a balanced and flourishing life!

WHY DO WE INSPIRE CREATIVITY AND GROWTH?

Kivumbi Robert
Art and Technology

The Art and Technology department in St. Francis is more than just a classroom filled with colourful materials. It's a space where creativity flourishes, imaginations come alive, and young minds explore the beauty of self-expression. From painting to sculpture, the art department plays a pivotal role in shaping a child's holistic development.

Art and technology helps children in gaining fine muscle control and strengthening eye-hand motor co-ordination, expressing feelings and emotions in a safe way.

Creative thinking supports problem solving in unique ways. By experimenting with colours, textures, and shapes, children learn to express their thoughts and emotions through non-verbal forms. This creative freedom helps build confidence and fosters innovation, qualities that are valuable in all areas of life. Through activities such as drawing, cutting, and molding clay, children enhance the growth of their fine motor skills.

In addition, Art provides a therapeutic outlet for children to process their emotions. Whether through painting or crafting, children find joy and relaxation in the creative process, which can contribute to their emotional well-being and stress relief.

Many art projects involve group activities, such as creating murals or working on a collaborative sculpture, weaving etc. These, teach children the value of teamwork, patience, and mutual respect, helping them build strong interpersonal skills.

Therefore, Art and Technology is an essential pillar of education, offering learners a platform to grow, explore, and discover their talents. By nurturing creativity and providing opportunities for self-expression, it helps shape well-rounded individuals ready to embrace the world with confidence and imagination. Investing in a vibrant and well-resourced art department is, therefore, an investment in the future of our children.

Merry Christmas and happy 2025.

GAMES AND SPORTS; THE HEARTBEAT OF EXCELLENCE

Muhumuza Nelson
Head of Games and Sports

Our sports department is more than just a place where physical education takes place; it is a hub of passion, discipline, and perseverance.

The role of sports in shaping young minds cannot be overstated. As Vince Lombardi, the legendary football coach, once said, "Sports do not build character, they reveal it." Through their participation in various sports, our learners not only hone their physical skills but also develop the values of teamwork, leadership, resilience, and respect. These values will guide them throughout their lives.

Our department prides itself on providing a well-rounded sports curriculum, offering a range of activities from traditional team sports like football, basketball, netball, to individual sports such as athletics and swimming. These activities continue during our holidays through the "continuous holiday skilling program". Each discipline is designed to challenge our learners both mentally and physically, ensuring that they grow stronger in every sense of the world.

We believe that every student has the potential to shine, and it is our mission to provide the tools, guidance, and opportunities to help them succeed. As our children continue to grow and develop, our sports department will remain a cornerstone of commitment to fostering well-rounded, resilient, and determined individuals ready to take on the world.

"Success is not an accident. It is hard work, perseverance, learning, studying, sacrifice, and most of all, love of what you are doing or learning to do."

Merry Christmas and prosperous new year.

THE SABBATH DAY OF AN ADVENT.

Twekise Betty
Teacher in charge of Advents

The Seventh Day Adventist honour the "Sabbath day" as a day of rest and reflection about **our creator.**

On the Sabbath, we gather for a special worship service where we engage in hymns, prayers and sermons. We also take time for personal reflection and meditation.

In our scripture reading, we find the biblical account of creation, where God took six days to create the world and rested on the seventh day, He sanctified and blessed it (Gen 2:2-3). This is an example for us all to observe the Sabbath day as God did.

As we observe the Sabbath day, let us remember that it's a day to recharge, refocus and reconnect with our creator, so we may return to our duties refreshed, renewed and ready to face the challenges of the world.

Stay blessed and happy time.

SWIMMING

Anthony Ebil
Swimming Coordinator

As an exercise, swimming provides all-round conditioning for both young and old. As a sport, swimming includes races that are held at athletic clubs, schools, national and international competitions.

Unlike many other animals, humans are not able to swim at birth. A person must learn how to swim. A beginning swimmer learns how to repeat a series of arm and leg movements called swimming strokes.

Swimming strokes provide the power to move a swimmer through water. There are five major swimming strokes, freestyle (crawl), breaststroke, butterfly, backstroke and sidestroke.
Freestyle swimming is noted for its speed.

A swimming contest is called a meet (gala). Athletic clubs, schools, national and international groups hold swimming galas in large pools marked with swimming lanes to guide the swimmers. The most important meet occurs every four years at the Olympic games. There

are races for individual swimmers and for teams of four. The team events are called relays. The short races test a swimmer.
St. Francis Day & Boarding primary school is always committed to imparting knowledge and skills to the learners during the course of the term and holidays. A well-laid schedule (time table) is designed to cater for all classes right from pre-primary to primary seven.

Alex Ssemwogerere
Head of MDD Department

Ritah Nanziri
Senior Female Teacher

Dear Parents/Guardians,
Here are Some tips for handling a girl child during her adolescent stage.

Try to understand that your child is going through many physical, emotional and cognitive changes. They may be struggling to become individuals and regulate their emotions.

- Listen to them without playing down their concerns.
- Encourage your teen to develop solutions to problems or conflicts.
- Help your teen learn to make good decisions.
- Create opportunities for them to use their own judgement, and be available to advise and support.

For sure true learning comes from both exertions of the brain and exercise of the body and without this element, life is not worth trying to excel at anything.

As the MDD department of St. Francis, we had several events over this academic year 2024 and amongst these are; Music, Dance, Drama and Poetry (MDDP) theatre production (competitive) for Primary and the Pre-Primary valedictory ceremony and grand presentations. These have provided a sense of accomplishment, and above all boosted self-esteem and confidence amongst our dearest pupils.

SAINT FRANCIS OF ASSISI OUR PATRON SAINT.

MS. NAIGA DONAH
Head of MDD Department

- He had a pure heart, and when he didn't, he immediately purified it by confession.
- He practiced mercy, even bathing lepers.
- He was meek and in a perpetual state of self-denial.
- Francis traveled to the Holy Lands hoping to conquer the Muslims with love rather than war.
- Francis set up the first known Nativity scene to celebrate Christmas in 1220.
- Francis was known for his love of nature and animals. It is said that one day he was talking to some birds when they began to sing together, they flew into the sky and formed the sign of a cross.
- It was also said that Francis could tame wild animals. e.g. There was a wolf in the town of Gubbio that was killing people and sheep. Francis went to the town to confront the wolf. At first the wolf growled at him and prepared to attack him. However, Francis made the sign of the cross and told the wolf not to hurt anyone else. The wolf then became tame and the town was safe.
- He received the stigmata two years before he died. These were the wounds of Jesus Christ from the cross including his hands, feet, and side.
- Francis became ill and spent the last few years of his life mostly blind. He died in 1226 while singing Psalm 141. He was declared a saint of the Catholic Church only two years after his death.
- October 4th is observed as Saint Francis feast day.

Such a great man was chosen to be a patron saint of our great school "St. Francis Primary School. Ntinda-Kigoowa!" St. Francis of Assisi, pray for us.(After reading this article, let me know how St. Francis strikes you.)

ADMINISTRATIVE PROFESSIONALS' DAY

Nalubwama Stella
Front Desk Officer

Admin Professionals' Day, also known as Secretaries Day, has a rich history dating back to the mid-20th century. The holiday was established to recognize the important contributions of administrative professionals in the workplace.

In 1952, the International Association of Administrative Professionals (IAAP) was formed with the goal of promoting the profession and providing support to administrative personnel.
The first observance took place on June 4, 1952, and was known as National Secretaries Day. It gained popularity quickly, and over the years, the date and name were modified to better reflect the evolving roles and titles of administrative professionals. In 2000, the holiday was officially renamed Administrative Professionals' Day.

Today, Admin Professionals' Day is observed annually on the Wednesday of the last full week of April. It serves as an opportunity for employers and colleagues to express gratitude and appreciation for the hard work, dedication, and organizational skills of administrative professionals who contribute significantly to the success of businesses and organizations worldwide.

A VIBRANT, HEALTHY AND MOTIVATED SCHOOL COMMUNITY.

Joshua Makaye
Deputy Headteacher Welfare

St. Francis P/S Ntinda stands out not only for its academic excellence but also for its exceptional commitment to the welfare of its pupils and staff. Recognizing that a healthy and happy school community forms the backbone of educational success, the school has implemented several initiatives that include; The provision of high-quality nutritious meals to pupils and staff which contribute to both their physical and mental alertness, creating an optimal learning and a supportive nurturing environment.

The weekly visits by our school doctor who does constant health checkups are also a regular feature of the school's welfare system. The school ensures that all pupils' physical health is monitored by organizing medical assessments and allowing any potential health issue to be addressed promptly.

The school is deeply committed to the professional development of its staff by empowering and enhancing their skills, keeping them updated with modern educational trends and expanding their professional networks. Throughout the year, opportunities for career growth and development are provided i.e. workshops, conferences, training sessions, support supervision and continuous professional development studies.

In a world where many institutions overlook the importance of Welfare, St. Francis P/S Ntinda shines as a beacon of care and continues to prove that a school can truly thrive when it prioritizes the health and happiness of its people.

THE ADVANTAGES OF BEING IN THE BOARDING SECTION.

Nakibuuka Stella Maris
Boarding Mistress

Our boarding section has given children the chance to try anything and everything, and to become exactly who they want to be. These solid foundations go on to create well-rounded and independent young people, who positively contribute to their communities and society as a whole.

You will ultimately realise that the boarding section;

1. Strengthens Intellectual Growth.

It is a perfect environment for children with a thirst for learning but also for those

who want to pursue other hobbies and passions, such as games and sports, extended personal reading, music, dance and drama etc.

2. Promotes Personal Growth
The boarding section has access to varied opportunities which means that children have the time and ability to satisfy their curiosity and perhaps even surprise themselves. This grows them so much by actively investing time in interests they're most passionate about enabling them to make choices as they grow.

3. Builds good relationships.
Our children have supported and encouraged one another, made lifelong friendships and shared wonderful experiences. The teacher-pupil relationship is also a supportive one, with an increased level of mentorship/guidance and therefore boosts pupils' wellbeing.

4. Teaches children routine management skills and structure.
These routines help students to develop their time management and organizational skills ready for the challenges of further education and eventually a career.

5. Develops children's Independence
Students naturally adapt to being away from home, looking after themselves, and managing responsibilities. Children learn to make their own decisions, navigate challenges, and prioritise their time. This fosters personal growth and self-reliance.

6. Creates Cultural Diversity Awareness
We have an ethos of equality, community and an environment that values all individuals and the contributions they make to school and the wider world.

THE ROLE OF PLAY IN CHILDREN'S GROWTH AND DEVELOPMENT

NALUKOOBYO JULIET
Section Head
Pre-Primary

Play is a cherished part of childhood that offers children important developmental aspects as it contributes to the cognitive, physical, social and emotional well-being of children. It also gives parents/guardians the ideal opportunity to fully engage with their children.

It is through play that children understand each other and make sense of the world around them by testing, observing, trying and imitating. Play gives children a chance to practice what they learn.

Dear parents and guardians, allow children to play with blocks, sand, water, dolls and puzzles.

Remember;
Giving your child plenty of opportunities to play is one of the best ways to help them grow into curious, creative, healthy and happy adults equipped with the skills they need today.

Next time your child asks to play with you, jump at the opportunity! Share the joy of discovery as you connect with each other and the world around you. "Children need the freedom and time to play. Play is not a luxury. Play is a necessity" (Kay Redfield Jamison)

BEING AN ANGLICAN IS THE BEST THING.

Nantambi Viola
(Anglican Church)

Many Anglicans believe being Anglican is "the best thing" because it offers a unique blend of rich liturgical tradition, moderate theology, a strong emphasis on social justice, and a global connection with diverse Christian communities, allowing individuals to experience a well-rounded and inclusive expression of faith across different cultures and contexts.

There are four historically developed pillars of the Anglican Church: ***The centrality of the Holy Scriptures, The Nicene and Apostles' Creeds, The twin sacraments of Baptism and Holy Communion, and The Historic Episcopate.*** I have found great joy and peace in the Anglican Church, a strong and physical connection to the Great Tradition. I hope you consider some of these reasons as you continue your own pursuit of Christ.
Anglicans believe that there is only one God, but there are three elements to this one God: God the Father, God the Son, God the Holy Spirit; that human beings' decision to reject this eternal God and live according to their own standards (sin) causes a relational breakdown between them; that God the Son is Jesus Christ. My Bishop is the Rt. Rev. Can. Moses Banja, the 6th Bishop of Namirembe Diocese. Proud to be an Anglican.

U TAMU WA KISWAHILI

MWALIMU MAKOKHA EMMANUEL
Teacher for Kiswahili

Kiswahili ni lugha inayotumiwa na watuwa Afrika Mashariki. Lugha hii hurahihisha mawasiliano kati ya watu. Pia huleta upenda na amani katika nchi. Isitoshe, Kiswahili hurahisisha mawasiliano kati ya kabila mbali mbali na tena huwasaidia wanabiashara.

Kwa sasa Kiswahili ni lugha ya lazima katika shule za upili kuanzia kidato cha kwanza. Ninafuraha kuwa wakurugenzi wa St. Francis – Ntinda walianzisha nfundishaji wa Kiswahili shuleni.
Wanafunzi wetu watakuwa na ujuzi wa kujibu na kuongea Kiswahili ndani nan je ya shule.
Hata watakapo jiunga na shule za upili (Sekondani) itakuwa rahisi sana kwao kusoma somo la Kiswahili.

Ninajiunga na walimu wenzangu wa somo la Kiswahili kote nchini kuomba serikali yetu kutekeleza ufundishaji wa Kiswahili katika shule za msingi.
Ninashukuru walimu wenzangu wa shule ya St. Francis kwa kupenda Kiswahili.

THE REASON WHY I LIKE MY GRANDMA'S PLACE

One place that is very important in my life is my grandmother's place.

She lives in a small village in the west of the country. I go there every time I go back home for holidays purposely to visit my grandmother, get away from the city and relax too.

The village is just a group of brown huts on a hillside with a couple of shops and it's really peaceful.

There is no traffic, just the sound of animals, birds and insects.
One reason why I like it is because it's a fabulous place.

My grandmother has a lovely garden and we sit outside the shade of her live trees drinking good milk tea and chatting. It's so peaceful. But the main reason why this place is important to me is my grandmother.

She is so kind to me and wonderful to talk to. Whenever I have a problem in my life, she has some good advice for me.

I would like to live there, though I prefer living in the city. I'm a city person. I'd rather live in a village for holidays than in the city.

Asaba Thekla Murungi

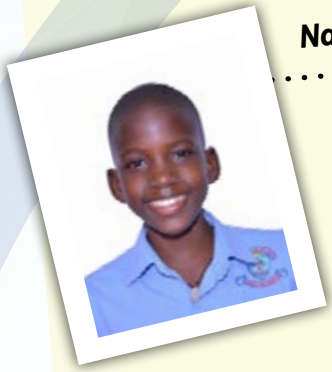
THE FUTURE

My name is Asaba Thekla Murungi, and I am a 12-year-old girl.

According to me, I think that in the future, there will be flying cars, robot waiters, flying schools and so much more. I have always dreamed of being a cardiologist in future. Why?? If you may ask, it is because I like to help sick people but most importantly, because my grandfather passed on due to a heart failure. I would not like the same thing to happen to others. Although my grandfather was famous, he couldn't help himself. However, he was very successful in his days (the glory days).

I want to work and live happily like he did, buy my dream car a "Bugatti Chiron", build my dream house, "a mega mansion with four storeys in height". I want to make my mum and dad really proud. Yeah, they have taken great care of me and are still doing the same. I would like to take the honour of paying them back by buying for them the latest cars, gadgets and so much more Above all, take care of their old selves.

In conclusion, I would like to encourage everyone to dream big until you reach your goals.



Nakiganda Hellen

PREPARE FOR TOMORROW

One of the meanings of tomorrow is the future. The future is the time that will come after the present.

TOMORROW IS THE FUTURE.

Wake up my fellow youths and prepare for tomorrow. The big question is "How can we prepare ourselves for tomorrow?" We can do this by joining training schools that teach various skills like tailoring, carpentry, baking and much more.

ACQUIRE VARIOUS SKILLS

As we try to build our future, we should try as much as possible to avoid bad peer groups. This is because bad groups will black our plans for tomorrow and make us fail to achieve success in life.

AVOID BAD PEER GROUPS.

In conclusion, I encourage youth who are seeking for career guidance, to ask their parents or teachers because they are our mentors.

Shazma Muzamil

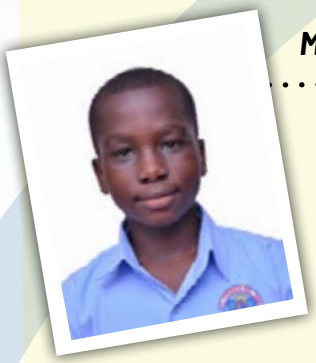
ADVISE TO THE PARENTS.

When I was growing up, my eyesight was weakening. And by the time I was 8 years old, I could not see things well, my eyes were squinted and my mother didn't know what was happening.

At first my mother thought that I was just being stubborn and playing around. Until she noticed that this was going on for too long. Since I was young and I was very playful, I would always fall even when things were right infront of me. My friends would call me from a distance but I could hardly see them well.

So, my mother decided to take me to an oculist who checked my eyes and noticed that I had serious issues with my eyes. He advised my mother to get for me eye lenses that now help me see well.

I would like to advise parents to be vigilant about their children during their growth and development because they may have certain disorders that need quick attention.



Malachi Daichi

MY SST TEACHER

My name is Malachi and I go to St. Francis Day and Boarding Primary School Ntinda for studies. I am in P.5. My favorite teacher is my Socialstudies teacher. His name is Mr. Wabomba Cyrrus, bom, bom but not bina bina, Wabox zero sugar, the brother from another mother but I just call him Mr. Wabomba. I like him because he is funny and he helps me when I don't understand work. He is my best teacher and I love him so much because he is the best SST teacher I have ever met. I wish other parents could bring their children to St. Francis Day and Boarding Primary School because it is one of the best schools in Uganda with very good teachers and other workers.

Atwine Marcia

HOW ST. FRANCIS CHANGED ME

I grew up performing well and being treated like a princess in every school I went to. From time to time my grades kept changing until they dropped to 50's. I still remember that I didn't even know what aggregates were. Things kept changing from better to worse and the best aggregate I would get was a 21.

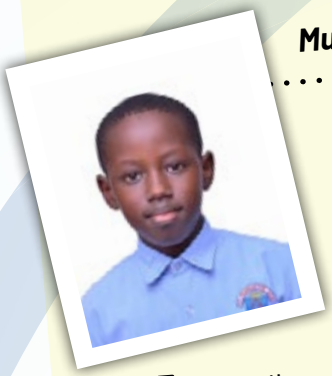
When I shifted to Kampala, I joined St. Francis. Things were really different here. It was work over and no special treatments of princess and the like. I quickly tuned in to suit the speed and standards of the school. Marks started improving from 50s to 70s and then to 90s. I completely started changing styles of learning. I was so excited to see that I had aggregate 9 and they started calling me the princess of P.4 East. When I was promoted to P.5 North, my pride was walked in and the grades were no more.

My teachers woke me up telling me that P.5 was just preparing me for the candidate class that writes a national exam (PLE) at the end of the next two years. The day my teachers sat me down, I realized that performance doesn't come on a silver plate. I woke up and worked hard and rose again. Till now I have kept on being an excellent learner. Thank you, St. Francis P/S, for changing my life.

Ayebare Dylan Tuhamize

WHEN I LEARNT ART

While I was young, I would see my uncle draw pictures. I asked him to teach me, he said it was okay. The first day he taught me how to draw a sketch. Finally, I learnt drawing faces. He was happy about my improvement in art. He gave me art pencils, a pencil bag and art books as my gifts. I was very happy about the gifts and him teaching me art. I would love to always show him the pictures I have drawn when he comes back from Kenya.

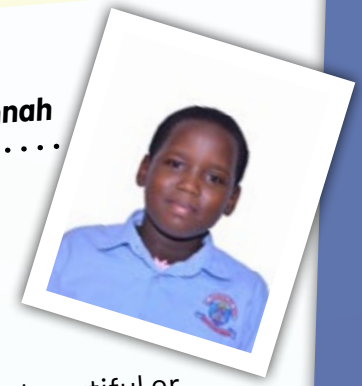


Mugira Joel

INDEPENDENCE

Hello fellow readers, my name is Joel.
I would like to say something about "INDEPENDENCE".

Uganda got her independence on 9th October 1962. Dr. Apollo Milton Obote was the nationalist who led Uganda to her independence.
The first political party was formed by Ignatius Musaazi, it was called Uganda National Congress (UNC).
Before becoming Independent, Uganda was under colonial rule.
If we did not fight courageously, Uganda wouldn't be at this state.
We should learn from our motherland Uganda to be independent in our lives.
Fight for your personal independence.



Ashaba Hannah

TAKE MY ADVICE.

1. Even if you are beautiful or handsome, remember that gorillas and baboons also attract tourists.
2. No matter the strength you have, remember that you won't carry yourself to the grave.
3. If you have a big house or land, remember you will carry yourself to bed.
4. Even though you have a family of one hundred people, they will always have their day of dying.
5. If you're rich, don't undermine poor people but remember that one day, you may be in their place.
6. Don't underestimate people and their generations. It will be you one day.

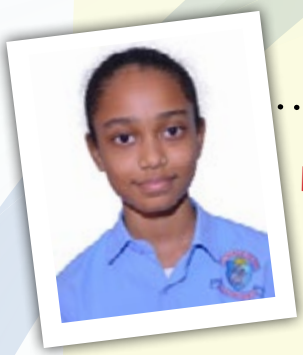
Atim Faith

LIFE OF A LAWYER

A lawyer is a person who is trained and qualified to advise people about the law, represent them in court and write legal documents. A lawyer helps clients in court with problems.

The only reason I want to become a lawyer is to help and defend the helpless clients. Most lawyers in Uganda are corrupt and it is a big problem to us. I want to be a faithful, trust worthy and God-fearing lawyer. My cousins have become lawyers and they have inspired me.

I would like to advise any one reading this to come up and say no corruption for a brighter Uganda.



Souad Mohammed

EDUCATION

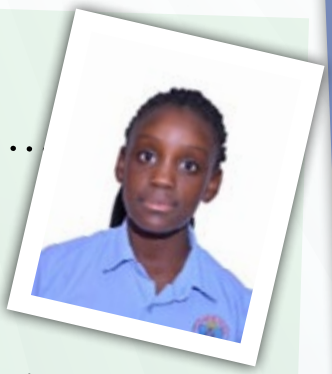
Education is the teaching or training of people, especially in schools, colleges and universities.

Education, as we all know, is the key to a successful and bright future. Most successful people, such as doctors, engineers and pilots, went to school to be educated on their professionalism.

Some may say; it is tiring and stressing but nothing good comes without hard work, determination and patience. Your attitude and discipline towards learning also determines how fast you can understand things.
Education can help us invent things we need in our daily life.

Therefore, my friends, education is such an important thing that we should value and thank God for every day.

Murungi Celine Elly



MY FUTURE CAREER

A career is the series of jobs that a person has in a particular area of work, usually involving more responsibility as time passes for example a teaching career, a career in medicine and a career in engineering.

My future career is to become a doctor. I want to become a doctor because I am inspired by my dad. I want to save many people's lives.

If you want to achieve your goals in future you have to work hard, do your level best, pay attention and listen to your elders then you will become what you want to be in future. Not only should you work hard but you should also have faith in God, pray and worship the Lord. That is what my dad followed and now he is a medical doctor treating and saving very many people's lives.

I encourage my friends and family to work hard and have faith in God if they want to have a bright future and become what they always dream of becoming in future.

Lubega Isaac

MY FOOTBALL CAREER

I have been in the school's football team for the past 2 years. I have played as a defender, striker and a field winger.

Actually, the day we played with Washington Soccer Academy, I scored my 1st goal in life. That inspired me a lot. I imagined how footballers celebrate when they score a goal and wished to carry that pride on my shoulders.

My dream is to be like Brazilian Eder Militao number 3 of Real Madrid, his hair style and the way he plays in defense inspires me a lot. Real Madrid has taken me up that I now know some Spanish words like; adios, abuelo, abuela and oola, nerd-migos'. Because Real Madrid is my team I dream about. These are some players I know in that team; Vini Jr (7), Rodrygo (11), Eder Militao (3), Mbappe (9), Carvajal (2) and Luca Modric the "Captain" plays (10). Madrid is the capital city of Spain so that's how Real Madrid came to reality.

Elizabeth Karamagi

STRANGER DANGER

Once upon a time in a village in Kasese, there was a woman named Mama Musa. She sold the biggest, most tender, and cheapest meat you could ever imagine! People came from all over to taste her meat. The smell of it sizzling on the grill was so yummy that you could almost taste it just by breathing in the air. It smelled like garlic, spices, and something... kind of strange. But no one thought much of it—everyone loved the taste!

Mama Musa became very popular. She always had a crowd of people at her stall, and they all praised her meat, saying, "It's the best meat in the whole land!" Even travelers would stop by to try it. But after a while, something weird started happening. People began to disappear! First, it was the loud market lady whom no one liked, then the baker, and soon, even the chief's fat cousin was missing.
The villagers grew worried. The chief told everyone, "Stay away from the forest! There's something bad out there."

But Akello, a curious girl, wasn't going to let this mystery slide. She noticed that Mama Musa had started acting strangely. Whenever someone asked her how she made her meat so good, Mama Musa would snap, "Don't ask stupid questions!" This wasn't like the kind Mama Musa everyone knew. Something wasn't right.

One evening after the market, **Akello** decided to follow Mama Musa. The sun was setting, and the sky turned dark as they walked towards the forest—the same forest the chief had warned everyone to stay out of. Mama Musa didn't head home like usual. Instead, she went deeper into the woods, where the trees whispered in the wind. Akello quietly followed behind her, her heart pounding.

Eventually, they reached a small hut made of grass. Mama Musa went inside. Akello peeked through the window and gasped. The room was filled with bloody clothes, and in the corner was a huge drum filled with... meat. It didn't look like chicken at all. It looked wrong. Akello's stomach turned. Before she could run, she heard someone behind her.

"Where do you think you're going?" a voice called. Two women in black dresses grabbed Akello and pulled her into the hut. Inside the hut, Akello

found three girls crying. "We were just picking firewood," one said, "and Mama Musa promised to give us all the firewood we could carry if we followed her. But she locked us in here and now we're scared!"
Akello felt bad for them and said, "Don't worry. I'll get us out of here."
That night, Mama Musa went to visit a friend, leaving the two women in black to watch over Akello and the girls. But soon, the women got hungry. "Let's go pick some fruit," one said, forgetting all about the prisoners.

As soon as they left, Akello quickly untied the girls, and they snuck out of the hut. They ran as fast as they could, the sound of their feet crunching on the ground, until they reached the village.
Akello rushed to the chief's house. "I know who's behind the disappearances!" she shouted. "Follow me!"
The chief's guards followed Akello into the forest. They found Mama Musa and the two women trying to escape, carrying bags full of meat. The villagers were shocked when the chief said, "Mama Musa and her helpers are the ones who took the people! They've been feeding us human meat!"
The villagers gasped and looked at each other, realizing they had eaten Mama Musa's meat. Some even felt sick to their stomachs.

Mama Musa and the women were locked up, but before they could be punished, they mysteriously died in their cell. The villagers never knew exactly how, but the lesson was clear: Don't trust what seems too good to be true. Always ask questions and stay safe!
And from that day, the village was peaceful again, with only the smell of real food in the air.

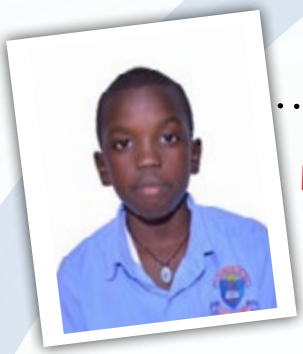
Kamanzi Hannah
Assistance Head Prefect

MY SCHOOL

St. Francis Day & Boarding Primary School – Ntinda is an amazing school. First of all, the food served to us is so delicious especially the food served on Wednesdays. Secondly, the teachers here at St. Francis are so kind, God fearing and knowledgeable. I can't mention enough.

My school has often planned thrilling activities like swimming, Art, Music, Dance, Drama and Poetry. For Music, I don't even know where to start, well there are different houses with different colours. I am in Leopard house and I put on yellow. Each house has a dance that they practice for example Tiger house is dancing ekitaguriro from western Uganda. I can't forget the beautiful vegetation in the school compound where green is everywhere.

St. Francis is such a beautiful and God-fearing school that all the pupils love it.



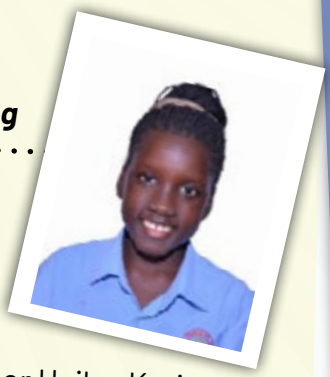
Ogong Ethan

MY LIFE

I was somehow stubborn but there were times when I would try to work so hard which helped me to be promoted to primary six which is the class I am in this 2024.

Sometimes life has been hard but now it's getting better because I am trying. I dream to become an animator but for now I focus on my studies. I still try to draw in my free time because I love drawing things in nature mostly after my homework. Am trying to work hard for a better future and for my mother because she is a single mother taking good care of me.

Aleper Hailey Koriang



MY DREAM

My name is Aleper Hailey Koriang, I am eleven years old in Primary Six. I am from Nakapiripirit, Karamoja. People undermine our tribe sometimes but I just ignore because all of us were created in the image of God.

My dream is to be a lawyer. I got inspired by my aunties Acham Bruna and Amiyo Judith who are both lawyers and earning big money. I like them because of their fluent English. I would want to become a lawyer purposely to stop corruption. During my holiday, an optician who attended to my mom encouraged me a lot when he told me the disadvantages of corruption.

My message to other Karamojong girls out there is to be strong in each and everything they do. ***Together We Can.*** They always say; ***Dream it, Work Hard and Achieve it!***

Salabwa Jeirah

MY DREAM

I was inspired by an accountant and my dream is becoming one too. He told me that I can get a lot of money to start my own business. I will build a company called Jeirah's cargo. I will tell people to ship with me and my company's name will be the best name around. Counting money is easy and I will make sure that I don't become a corrupt person in future. I am talking about corruption because some accountants are corrupt.

But I am happy with those who are not corrupt. Making money is my thing. This is why; I will use the money to build a mall, water park, restaurant and a school. I will start with the school because I want to see people being educated. I want everyone to be happy including myself.

KAMANZI HANNAH SHULE YETU

Shule yetu inaitwa St. Francis Ntinda – Kigoowa.
Ninapenda shule yetu sana.
Hii shule yeu ina walimu wazuri sona.
Walimu wanapenda wanafunzi na wanafundisha vizuri.

Sisi wanafunzi tunapenda mazingira hayo yong manjani na maua mazuri yenye rangi tofauti koma vile manjano, waridi, kijani na zambarau.

Tunasoma pia masoma mbali mbali shuleni mwetu. Masomo hayo ni koma. Sanyansi, hasibati, Social Studies, Kingereza, Kiswahili na Luganda. Masomo hoyo yote yona walimu wenye uzoefu mzuri sana. Wanatutundisha vizuri na tunaelewa masomo hayo. Pia shule yetu ina magari ombayo hutusa-firisha kuenda kuogelea katika bwawa la kuogelea.

Tunakula vyakula vitamu sana na vyenye afya njema.
Asanteni sana walimu katika shule yetu.

Oola Jayden

MFALME WA MSITUNI

Kuna wanyama wengi waporini. Wanyama haoni kama

Chui, Simba, Kifaru na wengine wengi, Katika haa wanyama

wote, kuna mnyama mkali sana wakutisha, akinguruma hivi, wanyama wenine wanakimba. Ama kwa kweli, Simba ni mfalme wa msituni.
Kila mnyama wa porini hampendi samba. Kwa hivysasi vizuri kuwa mkali kama samba kwasababuw watu wengi wanakuogopa ukiwamkali. Hatabinadamu pia wanamuogopa samba

Huyu mnyama anaweza hata kuaua watu.
Kwa hivyo, tunahitaji tuwe watu wazuri Ili tupendwe na wenzetu

Kuwa mkalisiyo vizuri. Nawashauri wanafunzi wawe watu wazuri shuleni, hata nyumbani.

Makala Hii Vandikwa Na Esther – Darasa La Nne Magharibi

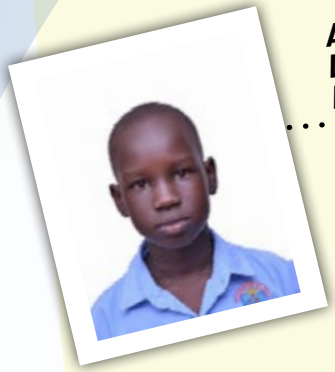
NDEGE NIMPENDAYE

Kuna ndege aina tofauti, kati ya ndege hoo, ninampenda korongo.

Korongo ni ndege muhimu sana katika nchi yetum, Ukitazama bendera yetu ya Uganda, inakorongo, Bendera yetu hiyo inapendeza kwasababu ya korongo.
Pia korongo anapatikana kwa kila pesa za Uganga, Hii inoonyesha kwomba korongo ni ndege mzurisana.
Ninampenda korongo kwasababababu ni ndege mzuri sana.

Ninampenda korongo kwasababu ni ndege mnyenyekevu na pia huashiria hali ya amani na utulivu katika nchi

yetu. Mimi ni mtu wa amani na ninapenda watu wanyenyekevu kama korongo Huyo ndiye ndege nimpendaye



Arok Manyok Darasa La Tano Kaskazini

WADUDU

Kuna wadudu aina mbili. Wadudu hatari nawale muhimu. Wadudu hatari ni kama: Funza, kirobato, kunguni, Nzi, mbu, mende na wengine wengi. Wadud muhimu ni kama kipepeo na Nyuki. Ninawapenda nyuki kwasababu wanatupatia asali.

Lakini kuna mdud moja ambaye ninamuogopa sana. Mdudu huyu ni hatari. Huyu mdudu anaitwa kunguni. Kunguni ni mdudu mbaya sana. Pia ni mjanja mna. Anapatika kitandani, katika magodoro na hata kwa nguo. Simtaki kunguni kwasababu yeye anaibisha sana. Anajificha na huezi kumuona. Kungumi haogopi hata waheshimiwa. Yeye anatembea nao hata afisini. Huezi kumuona kunguni, anaonekania mtu mwingine.

Kwa kweli kunguni mdudu hatari Unaweza kuji kunahadi ulie kwasababu ya Kunguni. Tunafaa tuwewasafi kwa mwili na hata nyumbani ili tuepuke kunguni. Nawashauri wanafunzi wezangu kuwawerevu kamasungura wamfukuze kunguni ili asiwangamize.

Aitas Joan

WHY I SHOULD BECOME A LAWYER?

My name is Aitas Joan and my dream career is being a lawyer. The reason as to why I want to become a lawyer is that I want to follow my big sister, Faith's steps and I want to defend the innocent in court. I want to follow my big sister's footsteps because she inspires me but she isn't the only one who inspired me. My family members also inspired me and that is the only reason to why I believe in myself that one day I will become a good lawyer.

Nkwanzi Stephanie

I DREAM TO BE A SURGEON

My dream is to become a veterinary surgeon. I want to become a veterinary surgeon in order to help sick and injured animals in Uganda and across the world. I dislike passing by sick or injured animals. It hurts me so much, and because I love animals, I will study hard to become a Vet in future.

Namaganda Cynthia

UGANDA'S INDEPENDENCE

In the past, superior countries tried to colonize Uganda. For example, Egypt tried to colonize Uganda basically to gain control of R. Nile but failed.

Britain later succeeded in colonizing Uganda due to its advanced weapons and improved system of administration. Some kingdoms and chiefdoms like Bunyoro and Acholi tried to resist colonialism but in vain. The British had strong governors like Sir Hesketh Bell who were wise in terms of administration. As time went by, Africans got united under political parties to demand for their independence. In Uganda, different political parties were formed i.e. UPC, DP, KY etc. Uganda later got her independence on 9th October 1962 led by Dr. Apollo Milton Obote of the UPC party.

Today, Uganda is an independent nation.

Joy Taban

NATURE

Hello friends, my name is Joy Taban, I am twelve years old and I study at St. Francis Day & Boarding Primary School Ntinda – Kigoowa.

Nature inspired me to love the world. It is a component of a variety of living things. I love nature because it is beautiful, peaceful and useful. For example, we get oxygen from trees, some plants provide us with herbal medicine, it is a source of income through tourism, etc. Oh, how I love nature!

Ainembabazi Elizabeth K. T

KENYA'S STRUGGLE FOR INDEPENDENCE

Mau Mau
Kenya cries in demand for land
Mzungu Arudi Ulaya Mwafrika
Apate Uhuru

MY CLUB

At my school, I belong to the Public Speech Club. Being a member of this club has helped me a lot. In Public Speech Club, we learn how to speak confidently in public. I have learnt that I should be audible and look at the audience while communicating. It has helped me to campaign confidently and I have successfully become a prefect in my school.

Murungi Melane

MY SCHOOL

My name is Murungi Melane. I am in Primary Five and a pupil at St. Francis Primary School – Ntinda. My school is very interesting. The beautiful natural compound makes learning enjoyable and meaningful.

The teachers and pupils in the school are very kind and friendly. Teachers teach in way children understand. At this school, we are fed on a balanced diet every day. I cannot forget to mention the competitive houses i.e. Red, Green, Orange and Yellow that compete healthily in Sports, MDD etc. I really love my school.

Nagaba Esther Murungi

LIFE

Life is the period between birth and death. God gives life generously to people, plants and animals. But at the same time, God can take it away. Without life, you have no use in this world, and when you have life, you need to guard it jealously and well.

As the Bible clearly states in Proverbs 6:16 – 19, that there are seven things that the Lord hates and cannot tolerate; a proud look, a lying tongue, hands that kill innocent people, a mind that thinks up wicked plans, feet that hurry off to do evil, a witness who tells one lie after another and someone who stirs up trouble among friends. Such things may change a person's life forever in a bad way. But if only you pray to God for wisdom, knowledge, understanding, peace and forgiveness, you will be blessed and live a joyful life.

Some people may say, "Today or tomorrow we shall go to a different town and spend a year there." But they do not know what tomorrow will bring. You are like a mist that appears for a little time and then varnishes.

Life is not all about eating but about the things you do. I encourage everyone to keep in prayer, read the Bible and never forget to trust and keep your hopes in God the Almighty.

Nyatuong Killeny

I'M FOND OF NATURE

I love the way God created us in our own unique ways. For example people have different opinions on things they do. They love to do what they like. Some dream of becoming engineers, sailors, doctors, pilots, ambassadors, politicians and musicians.

But for someone to become what they want, you should put studies as your first priority. As for me, I really want to succeed in my dream career of becoming a doctor. And as for you, don't give up on what you want to become. You are unique in your own way.

Agaba Isaac

FACTS ABOUT LIFE.

- No matter how beautiful or handsome you are. Remember that baboons and gorilla and chimps also attract tourists.
- Stop boasting, stop your pride; no matter how strong and brave you are, you will not carry yourself to the grave.
- Be humble; no matter how tall you are, you can never see tomorrow.
- Be patient; no matter how light skinned you are, you will need light to see in the darkness.
- Take caution: no matter how many cars you own, you will always walk to bed.
- Be contented; everyone needs one another in this world.

Namutebi Leticia

TRY AND FAIL BUT NEVER FAIL TO TRY.

We have clubs in our school and I belong to the cookery club. At first, I thought I did not know how to cook. I felt bad when I saw my friends participate. Then there is a day when I wanted to try, we were making salads.

I tried and guess what? I did it. I was so happy. My friends congratulated me. Since then, my motto is "Try and fail but never fail to try".

Kyangwa Keron William

UGANDA THE PEARL OF AFRICA

Uganda, the Pearl of Africa is a treasure of unforgettable experiences. Here are some best memories to cherish:

i) Natural Wonders

- Bwindi Impenetrable National Park: Trekking gorillas in their natural habitat.
- Murchison Falls National Park: Witnessing the majestic Nile River cascade.
- Queen Elizabeth National Park: Spotting lions, elephants and hippos.
- Lake Bunyonyi: Serene boat rides amidst stunning scenery.
- Sipi falls: Hiking to the source of the Nile.

ii) Cultural Experiences

- Traditional dances:Enjoying vibrant performances by local tribes.
- Local cuisine: Savoring Matooke, Luwombo and Rolex.
- Kampala's market: Exploring vibrant markets like Owino and Nakasero.
- Baganda Cultural sites: Visiting the Kasubi tombs and Kabaka's palace.
- Batwa community: Learning about the indigenous pygmy tribe.

iii) Historical Landmarks

- Uganda Martyrs' Shrine: Honours the brave martyrs.
- Lubiri Palace: Exploring the historic palace.
- National Museum: Discovering Uganda's history and culture.
- Kidepo Valley National Park: Visiting the ancient.
- Fort Portal: Uncovering the region's colonial past.

iv) Adventure Activities

- White water rafting on the Nile.
- Bungee jumping in Jinja.
- Hiking the Rwenzori Mountains.
- Paragliding over Lake Victoria.
- Quad biking in Mbarara.

v) Warm Hospitality

- Welcoming locals.
- Experiencing Ugandan warmth.
- Friendly street vendors.
- Engaging with entrepreneurs.

vi) Unforgettable Moments

- Witnessing a sunrise over the Savannah.
- Encountering mountain gorillas up close.

Uganda, the Pearl of Africa, shines bright with its diverse landscapes, rich culture and warm people.

Otai Ashley

WHAT IS TRANSPORT?

My name is Otai Ashley. I am in P.1 at St. Francis P/S Ntinda. My teacher told me that transport is the movement of people or goods from one place to another. In my community, we have types of transport and these are:

- Water transport,
- Road transport and
- Railway transport.

But we normally use Road transport because it is cheap and common.

Namunvu Evangeline

ALL YOU NEED IS FAITH

All my life, I have been moving by faith. My father and mother always tell me that all I need is faith like a mustard seed. God has made every dream of mine come true all because of faith. It all started when I was very sick and had to be taken for an operation. I was near death. My family had faith and now I am alive. I always prayed to God to provide for my family. He gave my dad a new car and a house. My mom recently finished her studies and passed highly.

There was a time my performance had lowered and I had given up until my best friend told me to read Hebrews, Romans, Galatians, Ephesians and James. They are all about faith and encouragement that gives you hope. Here I am giving a testimony about God's faithfulness.

Dear reader, I would like to remind you that Jesus is love for you and faith is all you need to go through this world of challenges.

Ngobi Rizwana

A PILLAR OF STRENGTH

This message is dedicated to someone very special, someone who has taught me values and given me confidence. She has inspired me to be what I am and that someone is my mother, Ms. Aisha.

She is the strongest woman on earth although life has treated her harshly in her past life. Much as she has faced a lot of difficulties, she has stood her ground to overcome and be an inspiration in my life.

Her top priority was education; she was always focused on her studies with the best handwriting and grades. She loved cooking. One time I told her to become a cook but she said that she would have become one but life isn't how you always expect it.

In conclusion, I request all mothers out there to support their children and be an inspiration to others and the young generation.

Atim Juddy Bliss Olupot

MY MOTHER

My mother is a hardworking, loving, supportive, courageous and intelligent woman. Sometimes I wonder if she is my mother or an angel. My mother is so perfect; whenever I fall she always picks me up. Whenever I lose courage, she always encourages me and never lets me cry. She is a woman who teaches us to honor others and have self-respect.

When I am sick, my mother does not sleep. She is awake all night to look

after me. A mother knows when their child is in trouble, pain and in need.

My mother helps me to prepare for the future. She always tells me that the world out there is so cruel but patience, intelligence, forgiveness and truthfulness can handle this world. Whenever people blame her because of my failure, she never feels bad, she always says, "You might have failed but I will always be by your side my child." She is a pillar of strength, a woman of self-respect, selfless, devoted and has unconditional love for her children. I always tell her about my dream of becoming an architecture and she is always saying, "You can make it, no one can stop you." Her professional, matrimonial life is a testimony for her unwavering devotion.

My mother made sacrifices for us and there is no way we can ever match up to her. No amount of money can pay or buy a mother's love. My mother is a woman of probity (honesty and decency).

In conclusion, never undermine a mother because of her job, dressing or accent, because a mother can even sacrifice her life for her child. Always love your mother if you want to be successful. My mother is the best gift I could ever get.

Namagera Maria Francesca

MY LIFE AS A BOARDING LEARNER IN ST. FRANCIS PRIMARY SCHOOL

As a boarding learner in this school. I have managed to obtain various skills and values which i would like to tell you about today.

To start with, boarding life mainly provides a better learning environment for pupils for example; learners have access to extra lessons which boost their academic performance.

Secondly, boarding life provides learners with ample time to develop their co-curricular skills. Some examples of these skills are debating, dancing, scouting, playing ball games and so on. In fact, the school administration holds regular concerts so that the learners can show off their skills and talents.

Last but not least, boarding school teaches us to be independent and manage ourselves instead of being under the umbrella of our parents all the time supported by home maids. A pupil who didn't know how to do house chores will return for the holiday when he or she has become a disciplined, organized and hardworking person.

In a way that I can take care of myself and my property hence training me to be independent and responsible.

All the above benefits can be obtained at St. Francis Day and Boarding Primary School Ntinda.

Akullu Esther Peace

BOARDING LIFE IN ST. FRANCIS

At St. Francis you can't notice that your parents love is missing because the parents who will provide that love are the matrons. They make sure we sleep comfortably.

In boarding we eat well and at least every fortnight, we eat sugarcanes.

We have aerobics every Saturday morning, which boosts our body fitness. During the weekend we have games and sports and the movie night is the most interesting part of it. The supper is so nice most especially on Thursday, where we have milk tea. Morning tea is always on time with a bite. Looking at the academic part of it. We are always ahead of the day school learners. The fear of the Lord is the beginning of wisdom. In boarding, every Sunday we have prayers/service/mass. We have never missed any Sunday prayers, may be while at home during holiday.
I don't see a reason for you to refuse coming to boarding.

Because Boarding is not a prison but a second home away from home.

Sempewo Daniel Kean
P.1 North

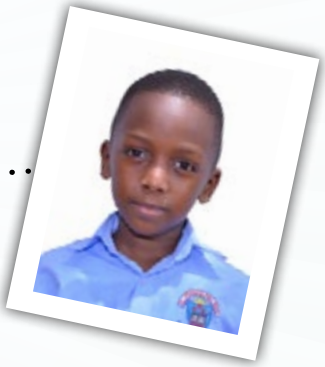
OH! I LOVE MY SCHOOL!

My name is Sempewo Daniel Kean. I am 6 years old. I am in P.1 North. I learn from St. Francis Day and Boarding Primary School. My school has well trained teachers and they are loving, caring and kind. Our Headteacher is called Mr. Mwima Thomas.

Our Directors are; Mrs. Lukwago Grace whom we call jajja and Mr. Mugerwa Nicholas. Our principal is Mr. Paul Richard Kasadha.

My fellow pupils are well disciplined and loving. Oh! I love my school!

Heart Kyle P.1



OUR ENVIRONMENT

My name is Murungi Heart Kyle. I am six years old.
Environment are things around us.
Plants, animals, people, buildings, trees and many more.

These things in our environment are very useful to us. We get shelter from buildings and trees. And so many other uses.
Oh! how I love my environment!

Angelicah Nansikombi

EDUCATIONAL DEVELOPMENT IN KENYA

1. The Arab education started in Kenya before western education and they established Koranic schools.

2. Development of western education in Kenya started with the missionaries for example the three German missionaries had established more schools in the interior of Kenya, to educate the sons and daughters of Europeans settlers.

3. In 1909, the Protestants established an alliance to avoid duplicating of pastoral and educational services in particular areas.

4. Alliance High School was opened up in Kikuyu land to educate bright students for further studies after primary education.

5. Other schools were established for example Kabosa, by the Holy Ghost fathers and Maseno by the CMS.

6. In 1911, the department of education was established to supervise the education of settlers' children.

7. In 1925, many Kenyan students had started coming to Makerere University College for higher education.

8. From 1929, churches also established their own schools especially in the central region.

9. Secondary education developed seriously in 1930s boosted by De La Warr Commission of 1937.

10. It recommended the establishment of a higher school of learning in East Africa.

Ejigu Haset Asefa

ETHIOPIA MY HOMELAND

1. Ancient history: Ethiopia is one of the oldest nations in the world, with a history that dates back thousands of years. It's often associated with the kingdom of Aksum, one of the great ancient civilizations that thrived in the region.

2. Unique calendar: Ethiopia follows its own calendar, which has 13 months. 12 months of 30 days and one month of 5 or 6 days. It is about Gregorian calendar.

3. Never colonized: Ethiopia is one of the African countries that were never fully colonized. while Italy occupied Ethiopia briefly from 1936 to 1941, it never succeeded in establishing lasting colonial rule.

4. Cradle of humanity: Ethiopia is home to some of the earliest evidence of human ancestors. The famous fossil skeleton known as 'Lucy" dating back 3.2million years, was discovered in afar region in 1974.

5. Diverse Languages: Ethiopia is a multilingual nation with more than 80 ethnic groups and as many languages, Amharic is the official language, but other languages like Orora, Tigrinya and Somali are also widely spoken.

6. Coffee's birth place: Coffee is believed to have originated in Ethiopia. According to legend, a goat herder named Koldi discovered coffee when he noticed his goats become energetic after eating coffee berries.

7. Religious Heritage: Ethiopia has a long Christian heritage and is home to one of the world's oldest Christian denominations; the Ethiopia Orthodox church. Islam also has a long history there and two religions coexist peacefully.

8. Capital city: Addis Ababa, the capital city, is often considered the "Political capital of Africa" because it hosts the headquarters of the African Union. It's one of the highest capital cities in the world, sitting at over 2,300 meters (7,500 feet) above sea level.

Nansubuga Natalie

THE BEAUTY IN LEADING OTHERS.

My name is Nansubuga Natalie. I have so many dreams like any other young child because we keep seeing and get interested in new things each day of our life but I guess I have to choose one out of the many. After sometime, I found out how much I love to be a politician. There are many reasons as to why politicians feel like living on another universe. As I trend through school, I am learning leadership roles. These I guess are preparing me for bigger offices in my future.

I thought of being a class prefect in P.4 but I failed. Being second in the elections, my dream never ended. In P.5, I tried running for Assistant Head Prefect and by God's grace and mercy, I won and that pushed me to run for a bigger post. So, in P.6, I run for the biggest post (Head Prefect) with strong votes from my friends and a wonderful campaign manager, I won.

As my parents always say go somewhere and find something new and I tell you jump into leadership, you never know what you will find.

Iyumva Hariy Aitana

MY DREAM CAREER

My name is Iyumva Hariy Aitana. I am a Burundian by nationality. Many of my friends really don't know what they want to be in future.

While others want to become lawyers, singers, engineers. I on the other hand want to become a doctor. But you may think to yourself "what kind of doctor will she become?" I will become a dermatologist. I want to help people with skin diseases.

I will work hard. Like my dad always says "to get what you want, you have to work hard for it".

Fredasha Mulungi

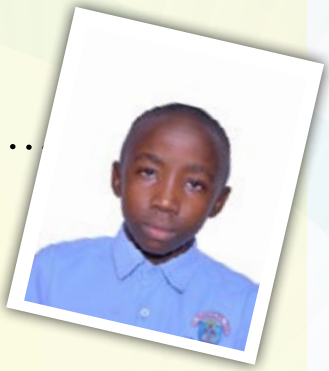
WHEN I GROW UP

When I was young, I used to think how mummy and daddy get money. Do they just make it or? Why do they leave so early at home? Why do I go to school every morning? Just then one evening my dad asked me what I wanted to become in future. I didn't have any idea to what he asked so, I asked him what he meant. He said that in one way or the other someone had to help the community by becoming someone like a doctor, teacher, engineer and many more.

He told me that there are many categories or types of doctors like surgeon, dentist, paediatricians. I was interested by the word paediatrician and I asked him what a paediatrician does. He told me he or she treats sick children. So I thought how I would help the world by treating children.

I asked my dad to take me to Mengo Hospital to see and ask the doctors some questions. We went in my dad's car, I was so excited to go there. When we reached, I thought I would play with children but playing turned into tears. Children were in terrible painful conditions. This gave me courage to work hard and build my hospital to help children who are sick. In a nut shell, I advise those who are reading my story to encourage others or to follow up their dreams to help the world.

Muyanja Josiah



THE BOY CHILD NEGLECT

In mixed schools where girls see themselves superior to boys, mocking the weak boys, disturbing the smart and undermining the dull. They freely socialize with teachers and using that to their advantage posing a threat of reporting you to the teacher.

Using their advantages to get what they want. Using their numbers to overpower the honest. Winning the title of head prefect as another successful mission to take control.

Disrespecting the boys even though a woman is meant to respect her husband or be punished as it was in the book of Esther 1:10 – 21. As a warning from God, for those who don't want to be replaced by others.

I hope all women reading this; remember they come from their husband's rib. So please give a man the respect they deserve.

Rugyene Daylan

MAKING THE WORLD A BETTER PLACE

My name is Rugyene Daylan. I am 12 years of age.

In the world, many people suffer from many things. These are disabilities, diseases, poverty, child abuse, accidents, wars, natural disasters and many others. All these can lead to death, loss of loved ones, loss of body parts and displacement of people.

When I grow up, I want to become a doctor. I want to help people with diseases like HIVAIDS and cancer. Funny on the other hand, I also want to become a footballer specifically to keep physically fit. I like both these occupations because they inspire children. When I become successful, I shall build orphanages for street kids in every country which will provide basic needs and education.

I want to provide parents who cannot afford basic needs with free medical care, shelter and clothes. For those who are displaced, I will provide basic needs for them. I shall encourage them to conserve the environment by planting trees, conserving water bodies and managing wastes.

I shall start a recycling company to reduce wastes in the environment.

Everyone in the world deserves a smile on their face. I pray that God helps everyone who is suffering to avoid giving up because the Lord loves every one and is always with them.

In conclusion, continue praying for me to achieve my dream so that the world is a better place.

Obongo Arthur Ethan

THE JUDICIARY OF UGANDA

The judiciary is the organ of government that enforces the law through the courts. It interprets the law to the people, settles disputes and conflicts, gives punishments to law breakers, protects human rights and swears in government officials.

The judiciary is headed by the Chief Justice.

Below is the list of Chief Justices who have served Uganda from 1961.

1. Sir Andley Makisok – 1961 – 1962
2. KG Bennet – 192 – 1963
3. Sir Udo Udoma – 1963 – 1969
4. Sir Dermoni Sheridan – 1969 – 1971
5. Benedicto Kiwanuka – 1971 – 1972
6. Samuel Wako Wambuzi – 1972 – 1975/1979 – 1980/1986 – 2001
7. Mohamed Saied – 1975 – 1979
8. George Masiko – 1980 – 1985
9. Peter Allen – 1985 – 1986
10. Benjamin Joseph Odoki – 2001 – 2013
11. Steven Kavuma – 2013 – 2015
12. Bart Magunda Katureebe – 2015 – 2020
13. Alfonso Owiny Dollo – from 2020 – up-to-date

Ayiko Jordan Ryan

MY EXPERIENCE OF TRANSITING FROM DAY TO BOARDING SECTION

My name is Ayiko Jordan Ryan and I was promoted to Primary Seven at St. Francis Day and Boarding Primary school, Ntinda.

It was one fine morning as my mother and I were taking a ride to my former school, my mum said "Jordan you will be going to a boarding school next year." My body shivered at the thought of being away from home and from my mother.

So, one day my mother brought me for interviews at St. Francis Day and Boarding Primary School Ntinda and I passed well. As we drove out of the school compound, I told my mother that I had already liked the school because of the many trees on the compound and this marked the beginning of my experience in a boarding school.

The day I officially reported to school as a boarder, I was scared. As soon as I entered my dormitory, I met my good friend Mukundane Alvin with whom we lived in the same estate. I was very happy and told my mom that now I could live.

The first night I slept thinking about home and my friends I left in my former school. At 5:00a.m, my matron woke all of us up and told us to lay our beds and go to the bathroom and bathe. We all got ready and there after headed for our respective classes.

My first stream was P.6 South and the class teacher was Tr. Julius Niwampaire a.k.a JJ. He was so kind to me. He was a science teacher and that is my favorite subject.

After one whole month of learning and finishing our Mid Term, we successfully did it and I was transferred to another stream. My new stream was West and Tr. Joseph; the class teacher and Gilbert his assistant welcomed us well.

So far, I have loved the boarding section and the school for the wonderful meals that have kept us healthy. I thank the cooks for a great job, the cleaners that have kept our environment clean.

To the teachers who have taught us throughout the year, we thank you. Our matrons are the best because they have taught us new skills and discipline.

Namatovu Marion Blessing P.3

DANCING TO THE BEAT OF MY HEART: MY JOURNEY AS A PASSIONATE DANCER

As I reflect on my journey as a dancer, dance is not just a hobby or a form of entertainment, but a way of life. It is an expression of my deepest emotions, a celebration of my culture, and a testament to my passion.

Growing up, I was inspired by my mother, Gloria, who would often dance

around the house to the rhythm of traditional African music. Her energy was infectious, and I would find myself moving to the beat, feeling the music deep within my soul. As I grew older, my love for dance only intensified, and I began to explore different styles, from contemporary to others.

For me, dance is a form of storytelling. It allows me to convey emotions and ideas in a way that words often cannot. When I am dancing, I feel free as if my body is speaking a language that is all its own.

As a pupil, I have been fortunate to have had the opportunity to share my passion for dance with my peers. Through our school's assemblies, I have been able to perform in various events, and to collaborate with other dancers who share my passion.

My love for dance has also taught me valuable lessons about discipline, perseverance, and creativity. It has shown me that with hard work and dedication, I can overcome any obstacle and achieve my goals. And it has given me a sense of confidence and self-expression that I am grateful for every day.

As I look to the future, I am excited to see where my passion for dance will take me. I hope to continue performing and sharing my love of dance with others. And I hope to inspire others to find their own passion and creativity, whether it is through dance or some other form of expression.

Wagabaza Elianahm – P.6

MY SUPER STAR MERCY CHINWU

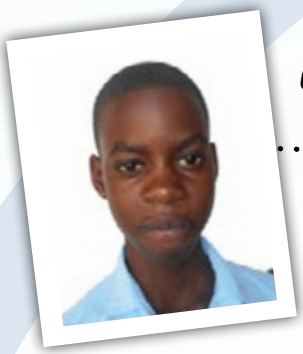
Hello people reading this. My name is Wagabaza Elianah. I am 11 years old and I study from St. Francis Primary School.

Today, I want to share with you about someone who inspired me to push harder in what I love to do. And her name is Mercy Chinwu.

Mercy Chinwu is a beautiful talented gospel singer. She comes from Nigeria and was born in Uganda. When she was only 5 years old they received bad news that her father died in an accident. From that day, she never felt like herself again. After some years, she started finding an interest in singing and then developing it, but her mother only tried to help her because they lived poor. But Mercy didn't give up on her dream, she worked hard at secondary and also had a part time job.

After saving enough money, she managed to produce her music in a studio and then her song went world-wide. This prompted a rich producer to offer her 10 million to buy her songs. Mercy and her mom were very happy.

Soon Mercy went to concerts, world tours, everything was there. But there is one message she gave to the little children it says "Never give up on what you love because God will never leave you". This inspiration has never run out of my head and I too live with hope and push harder.



Odere Julian Precious

MY WAY TO VICTORY

My name is Odere Julian Precious and I am the head monitor of St. Francis. This is my second time into power. Like any other person, I had reasons why I wanted to be the head monitor. There were challenges in my journey though. Some of these included being opposed by my longtime friend, PJ among others. He was a famous child in boarding. Known for singing during the Sunday vibes that was participated in by all boarders on Sundays. So, some people said that PJ might win me, but I never lost hope because my other friends were encouraging me that I could do it. And I really wanted to prove it. The reason why I really wanted to become the head monitor was because of the then Head Monitor, Majorine. She really had a nice accent and I really liked it. So, I couldn't give up. Now the day for the elections came and we voted. That very day votes were counted; I was on pressure. When the results were out. I had won the election. I was very happy and that day I learnt never to give up. I encourage everyone to just trust and believe in yourself.

Kavindu Tasha Cleopatra

SOUTH AFRICA'S HISTORY

In 1947 Nelson Mandela became the Secretary General of Youth league of ANC as well as a lawyer. Africans were arrested breaking apartheid laws in court. Mandela and other leaders wrote the freedom charter for equal rights in South Africa. Mandela campaigned for the liberation of black people. In 1962 he was arrested with other leaders by whites, he was sentenced to life imprisonment at Robben Islands in the Atlantic Ocean.

In 1990 after being imprisoned for 27 years he was released unconditionally by the then South African president Fredrick de Klerk. Before, whites used to treat blacks like slaves while Mandela was in prison, so Mandela continued fighting apartheid through newspaper articles and letters.

Mandela fought and South Africa got her independence for he won multi-racial elections and became the first democratic black president of South Africa in 1994. He successfully campaigned for South Africa to host FIFA World Cup in 2010. He served South Africa for only one term from 1994 – 1999. While he died on 5th December 2013 at an age of 95 years, he was born in 1918.

Mukamusoni Melanie

FORMATION OF POLITICAL PARTIES

Political parties are organized groups that share the same ideas of governing a country.

The first political party to be formed in Uganda was Uganda National Congress (UNC). It was formed by Ignatius Kangave Musaazi.

Uganda people's Congress led Uganda to independence. Uganda got her independence in 1962. The union jack was lowered and the Uganda National Flag was raised for the first time.

Dr. Apollo Milton Obote became the first executive president of Uganda. Many presidents have ruled Uganda since independence and today, the current president is H.E. Yoweri Kaguta Museveni.

Blubber is a layer of fats usually in sea mammals like the blue whales. These wonderful creatures use the blubber for warmth. Sadly, these magnificent marine creatures are today classified as endangered species.

Ayiko Jordan

FACT

Did you know that the biggest animal to ever be studied by the scientist all over the world is a blue whale? The blue whales are the biggest animals in the world. They normally live in most oceans e.g. Atlantic, Pacific, except the arctic. Blue whales can grow to over 30m long and weigh more than 130,000kg. Its tongue weighs as much as an elephant. Their calls are the loudest of any creature on the planet. In fact, it can be heard under water for hundreds of kilometers. The young one of a blue whale is a calf. It suckles on its mother's rich, fatty milk.

The blue whales use a substance layer of fats usually called blubber.

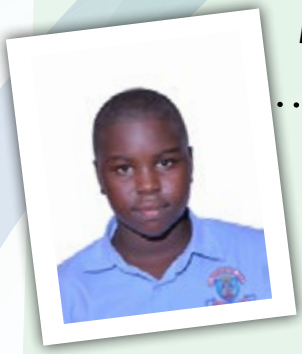
Namujju Mary

ALLOW THE CHILDREN TO BE!

I have a talent of netball and football but I love netball more because I have nice trainers and they encourage me to put more effort. When I reached P.6, playing netball became difficult for me because I was busy in class.

But when my parents told me to drop some games and I concentrate on my studies, I got frustrated. What do I mean? Our parents sometimes do not know about our talents. We have to tell our parents the impacts about skills and talents. Some of us, skills and talents have changed and developed us. Please mothers and fathers let us develop our talents and skills. You never know what tomorrow holds for us. You may want very high grades from me but also that talent can turn me into a great person.

I thank the Lord that gave me the skills and talents.



Malimi Hannah Lisa

I WISH I BECOME A PILOT

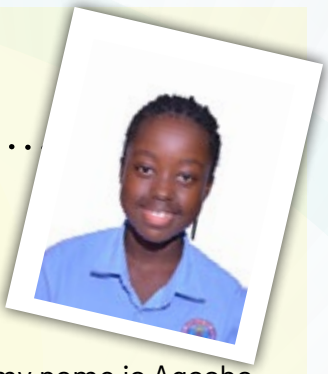
As a child, I always wondered how my parents could make money. When I turned nine years old my class teacher, Tr. Sam requested us to go and find out what a career was and what we wanted our careers to be. So, as I was going home one day with my parents, I asked them what a career was? After them telling me what a career was, I understood what my teacher wanted us to tell him in the next lesson. I started thinking harder than before.

When I went to school the next day, every one mentioned what their future careers were and then Tr. Sam asked me, "What my career was" and by this time, I was ready with an answer.

I told him I wished to be a pilot. He continued to ask me why I wanted to be a pilot? Truly speaking teacher Sam, I replied, ever since I was 4 years old, I have loved to play with toy aeroplanes and whenever my mother could buy for me Barbie dolls, I could refuse them and ask for aeroplane toys. I also loved to watch movies which involved aeroplanes.

"Those are my reasons why I want to be a pilot" I concluded. I would like to encourage children to dream big for their future and the dreams start now.

Agasha Shanita



ANGELICA HALE

Hello people, my name is Agasha Shanita. I am 12 years old and I study from St. Francis Primary School.

Today, my inspiration is from Angelica Hale. I do what I love to do (dancing & singing) because of what she is.

Angelica Hale was born in Texas, California. She was 5 years when she started singing. When Angelica was 7 years old, she had a kidney disease. Therefore, she was not able to sing. But luckily, her brave mother sacrificed a kidney to Angelica Hale to sing again.

After some years, Angelica was ready to go to "America Gets Talent" to perform and then she successfully went to the next level.

In the end, she became a famous star only at 15 years.
I would love to be like her.

Poni Lydia John

CORRUPTION IN UGANDA

In the lush landscapes of Uganda, behind the veil of the picturesque scenery, I am perturbed to know of the silent epidemic that lies in

Uganda's corruption.

Corruption is the dishonest and illegal behaviour especially among government officials. Where corruption often rears its ugly head, President Yoweri Kaguta Museveni reacts and asks for an investigation. Corruption may even be the root cause of the under development in Uganda making it so hard to get vital services in different aspects.

In the recent past, iron sheets were to be sent to Karamoja for use but to my surprise they never reached Karamoja. Few months passed and some ministers were accused of stealing the iron sheets. They were investigated and made to serve their punishment for embezzling government funds.

Any government official who is corrupt should be sentenced to life imprisonment. I SUGGEST

Awor Abigail Chemutai

WASTE MANAGEMENT IN OUR COMMUNITY

Wastes are materials that have been used by people and have less value. The wastes are categorized into two i.e. bio – degradable and non-degradable wastes. Through waste management, people in our community should observe proper disposal of wastes and use of 5Rs to manage wastes. The 5Rs stand for;

-Re-use wastes where you can reuse for example plastic bottles as flower vessels to improve on the beauty of their compounds other than destroying the environment.

-Return wastes where they were made e.g. wastes like glass bottles to glass industries other than throwing them in the environment.

-Reject wastes. The community can come up with plastic and polythene use policy and encourage people to use paper bags. The other two Rs are Repurpose and Reduce wastes.

Rugasira Francis

THE SOLAR SYSTEM

The solar system consists of the sun and other heavenly bodies that are kept in position by the force of gravity. These heavenly bodies include planets, dwarf planets and asteroids.

The heavenly bodies go round the sun in a nearly flat disc called the Ecliptic plane. The planets are grouped into inner planets and outer planets.

The inner planets are Mercury, Venus, Earth and Mars. These planets are also called terrestrial planets. They are made of rock and metal. The outer planets are Jupiter, Saturn, and Uranus

Namagera Maria Francesca

THE GENESIS OF WORLD WAR ONE

This war started on 28th June 1914 due to the murder of Archduke Franz Ferdinand, the Crown Prince of Austria by a Serbian student.

Austria, a friend of Germany declared war on Serbia because of the death of their crown prince Franz Ferdinand. When Austria declared war on Serbia, Russia and France joined to support Serbia.

Germany the ally of Austria declared war on Russia and France for supporting Serbia. Later on, Britain joined Russia and France to fight Germany and Austria.

This war lasted for four years and ended on 11th November 1918.

Germany was later on punished for starting the first world war by the League of Nations which was formed to promote world peace.

Among the punishments given to Germany were: -

Germany lost her colonies in Africa.
Germany was stopped from making dangerous weapons.
Germany was made to pay all the war losses.

Asasira Agatha

DID YOU KNOW?

The earth moves round the sun in an anti-clockwise direction on a path called an orbit. This movement round the sun is called revolution. The earth takes 365 days or 366 days (1 year) to make one complete revolution. The revolution causes the four seasons, that is spring, summer, autumn and winter.

By convection a year has 365 days the ¼ day is ignored in the three consecutive years termed the ordinary years made up for, which is called the leap year, with 366 days.

That is why the month of February is 28 days in an ordinary year and 29 days in a leap year.

Nassali Aidah

MY FAVOURITE SUBJECT

My name is Nassali Aidah. I study at St. Francis Day and Boarding Primary School Ntinda. I am in Primary Five North.

In my class, Science is my favorite subject. It is taught by my favorite teacher; Tr. Twijukye Rodgers and that's why I choose Science as my favorite. Another reason why I like

Science is because it is the subject I need to focus on if I want to become a doctor.

When I grow up, I want to become a doctor and save many lives. I would like to become a doctor because I do not like to see the people of Uganda suffering from diseases. This is why I shall complete my studies and build my own hospital. The final reason why I like Science as a subject is because it helps us to compare the things around us and the things we learn in class.

Maison Nkuraije

MY SUPERHERO MOM

Hi, I am Maison, I am in Primary Five North. I study at St. Francis Primary School, Ntinda. Life in boarding school can be tough but it has made me realize just how amazing my mother is. Being away from home, has taught me to appreciate everything she does for me.

My superhero Mom!
My mom handles everything at home and still finds time to care for me, even when I'm away. She sends me many things, reminding me of her love and I always feel comforted when I get them.

My biggest supporter!
She has always been my first teacher and biggest cheerleader. Whether it's school work or sports, she encourages me to follow my dreams. Her belief in me gives me the confidence to keep going.

Her home love!
Nothing beats coming home to her cooking! I miss her meals so much and the thought of them makes me to look forward to every holiday.

Nakalule Mary Claret

MY SCHOOL

I really love and enjoy my school. There are very many things done in school but the best of all is the giving of gifts to best performers in handwriting, academic, smartest and most disciplined child in class.

This encouraged me to work hard and become one of the pupils read at the assembly.

I started practising my handwriting slowly by slowly until I perfected. At the end of term two I was recognized and called infront of the many pupils and teachers who were eagerly waiting.

I felt so good to have a handshake with the headteacher, principal and director.

I advise all pupils to work hard and achieve their best.

Kalembe Robinah Esther

MY FUTURE CAREER

Ever since I was young, I have been dreaming of being a doctor. I was inspired by aunt Dr. Racheal one of the most hard working and out-standing doctors at Norvik hospital and our family doctor Dr. Katumba.

In lower primary my teachers used to tell me about different types of doctors like surgeons, opticians and paediatricians. This kept my mind thinking of which doctor I wanted to be. Until I made up my mind to become a paediatrician. This was because I wanted to ensure health for all children across the world. It started from seeing the way children were suffering from flu, cough and colds in schools.

I advise all youth to work hard and join me so that we can fight against diseases in children.

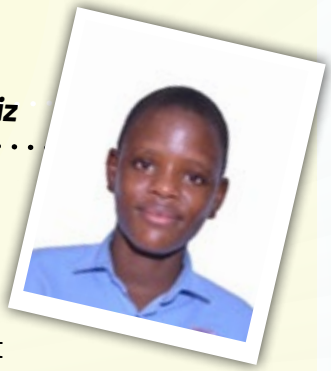
Naigaga Pearl Belinda Kirabo

PUBLIC SPEECH CLUB HAS TAUGHT ME CONFIDENCE.

My name is Naigaga Pearl. I am in Primary Five East.
I don't regret joining public speech among the clubs at school. I have always wanted to become a fluent and confident child. Whenever I tried to stand up and speak in class, I developed phobia but through debating and talk shows. I no longer fear and panic.

Thank you, our club patron Tr. Roy Paul, Tr. Eunice my teacher of English and all my teachers at St. Francis

Nadia Abdulhafiz



My name is Nadia Abdulhafiz, I am in P.6 South at St. Francis Primary School.

My dream is to become a pilot ever since P.2. Whenever I look at the sky, I feel like flying an aircraft in the sky. I know that other people think women can't fly aircrafts but that is very wrong nowadays. What a man can do even a woman can do.

I Nadia, think we have a right to become pilots. I can do a better job than a man and I pray to Allah that my dream will be filled with care and love. I will do it as a woman and I will become the famous pilot on earth.

ON THE ROAD

From dawn to dusk
Roads are full of different road users
Heading to different destinations
In the city or village

Pedestrians trek to the pavements
Passengers sit comfortably in taxis and buses
As they pass by
Trees appear as if they were running backwards
Yet they are stationary.
Hand signals, traffic lights, indicators
And horns are used for communication
The red light commands the driver to stop
Orange light alerts him to get ready
While the green light tells him to move on

With an indicator, one can make a left or right turn
Traffic officers help to keep law and order on the road
Smartly dressed in their uniform
They stand at the road junctions
Because safety on the road is for all

Mutumba Montez Miracle

DISCIPLINE

Discipline! Discipline! Discipline!
A leader to success to those who observe you
They become successful in all that
They do once they allow you to drive them
Discipline! Discipline! Discipline!
A source of peace in schools
Families and villages
You bring about harmony
And love to people
And this fosters development
In communities.
Discipline! Discipline! Discipline!
You are indeed good
That's why most of your letters
make the word 'disciple'
meaning that Jesus' disciples
were disciplined.
Oh! Discipline! My Hero
I wish fellow pupils
Loved you and allowed you
To rest in their hearts
Because as a matter of fact
They can't excel in academic
Without you

Kirabo Amazing Favour

Mother! Mother!
Mother!
Oh, how I love you mother.
You carried me for 9 months.
You take care of me when I am sick.
You cover me with all your love and kindness.
You teach me about God.
I thank you for bringing me to the best school.
St. Francis Day and Boarding Primary School Ntinda.
Father! Father! Father!
First of all, you are the best father ever. You
provide everything I need, food, shelter, clothes
and school fees.
You guide and counsel me when I am in wrong.
You help me to be the best.
Thank you.
A father builds a house and a mother makes it a home.

Christine Rinnah Mulelengi

ROAD SAFETY!

A useful tool I am!
Yet a few read or even follow me
Equipped with all the road guidelines
To ensure safety
I am not different from a recipe
If followed, the tastiness will be felt.
In me are very many things
Those road users should embrace
To save us from the monster of road accident
The zebra crossings
where pedestrians cross
Humps ahead to ensure motorists and cyclists slow down.

Come out you, road users from those
Blankets of carelessness
Make good use of me
Follow everything I tell you
For Uganda will be free from road accidents
The beauty of road safety.

DEATH ANNOUNCEMENT

THE FAMILY OF YELLOW BANANAS AND DRY CASSAVA WITH DEEP SORROW ANNOUNCE THE DEATH OF THEIR BELOVED SON PANCAKE WHO PASSED AWAY THIS MORNING.
PANCAKE FELL IN COOKING OIL THAT WAS HEATED BY FIRE IN A SAUCEPAN VILLAGE.
BURRIAL WILL TAKE PLACE IN STOMACH VILLAGE AT LUNCH TIME.
INFORMED ARE MR. MOUTH, TEETH AND OTHER RELATIVES.

COLONIAL RULE AND REBELLIONS IN UGANDA

Sir Gerald Portal was sent to study the political structure in Uganda.

In 1893, he raised the British flag in Uganda. He also recommended Uganda to be declared a British protectorate. The raising of the British flag in Uganda was to show that Uganda was colonized by the British.

In 1894, Uganda was declared a British protectorate by Sir Lord Roseberry.
Rebellion in Uganda
Rebellions were staged to fight for independence in Uganda because the British were harsh to Ugandans.

The Lamogi rebellion was staged by the Acholi in Northern Uganda because of forced gun registration. This rebellion was led by chief Awich of Payera.

The Nyangire rebellion was staged by the Banyoro in Western Uganda. This rebellion was led by Omukama Kabalega due to the need for independence.

Mwanga's revolt was staged by the Baganda in Central Uganda. It was led by Kabaka Mwanga II. He was defeated by Sir Henry Colville and exiled to Seychelles Island.

CELEBRATING ST FRANCIS OF ASISI DAY

EMPOWERED TEEN CONVENTION

Mrs. Kizito Ketra
Empowered Teen Coordinator

From November 9th to 14th, 2024, St Francis Day and Boarding Primary School hosted the Inaugural Empowered Teen Convention (IETC), a comprehensive and engaging experience designed specifically for children and teenagers between the ages of 10yrs to 19yrs. Essentially, it is an annual event that will always run at the close of the year and will be organized as resident or nonresident.

The convention's program was carefully assembled and fashioned to address the unique challenges and concerns faced by children and teenagers in today's fast-paced world. The sessions included:

1. Communication Skills and Public Speaking facilitated by **Mrs. Kizito Ketra** the Lead Convenor.
2. Child Abuse Prevention and Awareness
3. Career Guidance and Exploration explained by **Dr. Fredrick Kisekka-Ntale.**
4. The Dangers of Drug and Substance Abuse
5. Mental Health and Wellness guided by **Counselor Gitta Emmanuel.**
6. Multiculturalism and Social Cohesion.
7. Media Literacy and Responsible Social Media Use facilitated by **Mr. Sam Wamukota**
8. Reproductive Health, HIV/AIDS Awareness, and Prevention facilitated by **Mr. Kambaza Stephen.**
9. Team-Building, Decision-Making, and Emotional Intelligence.
10. Inspirational Talks and Social Interaction: The convention featured motivational speakers such as **Rev. Fr Deogracious Kiibi-Kateregga** who shared inspiring stories of overcoming challenges and achieving success.
11. Parental Involvement

In view of the above, the Empowered Teen Convention holds great importance as it:

- Equips students with essential life skills to navigate adolescence and beyond.
- Fosters a supportive community that promotes positive relationships and social cohesion.
- Provides a platform for students to express themselves, share their concerns, and receive guidance.
- Empowers parents to play a more active role in supporting their children and teenagers' emotional and psychological growth.

The Convention was a great success and it was able to reach the desired goal with many children and teenagers Empowered and Parents very thankful for the impact observed in their children.
